## Research Interest

AI is revolutionizing every sector today, and I am eager to contribute to its research advancements. My interests focus on Neural Machine Translation (NMT), Large Language Models (LLMs), and Machine Learning (ML), particularly in developing models that can drive innovation in language technology. I am also fascinated by the potential of AI Agents powered by LLMs, exploring their capabilities in autonomous decision-making and task execution. Through my academic journey and hands-on research experience under esteemed mentors, I have developed a deep commitment to applying my skills and knowledge in this rapidly evolving field.
